

Label End Alarm, (LEA)

External label end detector with flash light and siren for labels, tickets and tags.

The label end alarm is well adapted accessory to printers in the **Intermec EasyCoder range**.

The label end alarm is designed for detecting the label roll size and give a alarm by sound and flash light whenever the label roll size are under the min size of what the label end alarm is adjusted for.

The customer sets the alarm according to his own need.

By means of switches you can control if you want to have siren or not and power on/off.

- External label end alarm for labels, tickets and tags.
- Label end alarm offers advantages when printer is in an production line or operates without personal, by itself.
- Adapted for the **Intermec EasyCoder**.
- Easy to control the siren.
- Easy installation.
